

Treino de condicionamento físico para remo

Prof. Marcos Ito

Nesta segunda semana, realizar 2 séries nos treinos 1, 2, 7 e 8.

	segunda-feira	terça-feira	quarta-feira	quinta-feira	sexta-feira	sábado	domingo
opção 1	treino 5	treino 5	treino 5	treino 5	treino 5	treino 8	Descanso
	treino 4	treino 1	treino 4	treino 2	treino 1	treino 6	Descanso
opção 2	treino 3	treino 1	treino 3	treino 1	treino 3	treino 8	Descanso
	treino 4	treino 2	treino 4	treino 2	treino 1	treino 6	Descanso
opção 3	treino 5	treino 3	treino 5	treino 3	treino 5	treino 8	Descanso
	treino 4	treino 1	treino 4	treino 2	treino 1	treino 6	Descanso
opção 4	treino 5	treino 5	treino 5	treino 5	treino 5	treino 8	Descanso
	treino 7	treino 4	treino 7	treino 4	treino 7	treino 6	Descanso
opção 5	treino 3	treino 1	treino 3	treino 1	treino 3	treino 8	Descanso
	treino 7	treino 2	treino 7	treino 2	treino 7	treino 6	Descanso

Treino 1 - CIRCUIT TRAINING I

Objetivo: Adaptar-se aos exercícios de força corporal e aumentar força.

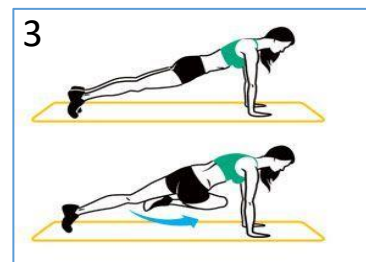

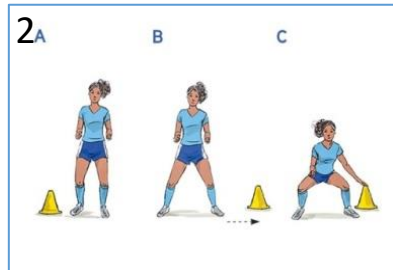

10 repetições de cada exercício, sem pausa entre eles. Até completar 10 minutos.

Treino 2 - CIRCUIT TRAINING II

Objetivo: Adaptar-se aos exercícios de força corporal e aumentar força.

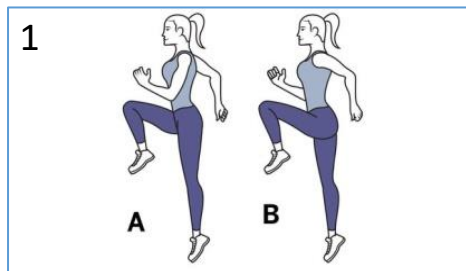

10 repetições de cada exercício, sem pausa entre eles. Até completar 10 minutos.

Treino 3 - CIRCUIT TRAINING III

Objetivo: Desenvolver a resistência aeróbia com exercícios corporais

30s de repetições para cada exercício, pausa de 30s entre eles.
Seguir a sequência e realizar 3 séries, 5 minutos de descanso entre séries.

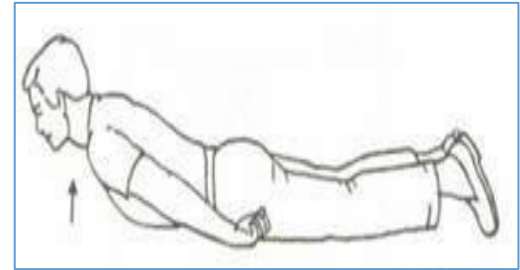

Treino 4 - Força corporal

Objetivo: Adaptar-se aos exercícios de força corporal.

Nessa sessão de treinamento podemos fazer várias séries, mas totalizando o valor pedido. Por exemplo, poderei fazer 5 séries de 40 repetições no exercício abdominal e também poderei variar o exercício.

200 abdominais

200 dorsais

45 masculino
30 feminino

90 burpee

Treino 5 – Treino aeróbio

Objetivo: Aumentar a resistência aeróbia.

Nesse treino recomenda-se ter um relógio que monitora os batimentos cardíacos para mensurar a intensidade do exercício.

Duração do treino: **30 minutos direto.**

Existem 4 sugestões de exercícios aeróbios.
Escolha aquele da sua preferência e possibilidade.

Remoergômetro - Manter freq. cardíaca entre 75% - 80% da máxima (220 - idade).

Corrida - Manter freq. cardíaca entre 75% - 80% da máxima (220 - idade).

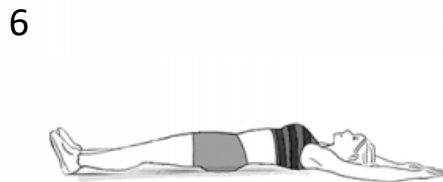

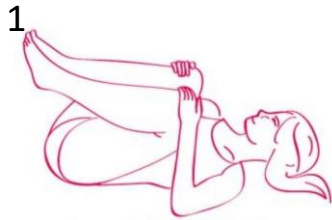

Caminhada - Em algum momento faça uma pequena corrida de no máximo 2 minutos.

Bicicleta - Manter freq. cardíaca entre 75% - 80% da máxima (220 - idade).

Treino 6 - Alongamentos

Objetivo: Aumentar a flexibilidade.

Os exercícios serão em sequência e com permanência de 25 segundos em cada posição.
